

Lesson 20: Composite Area Problems

Classwork

Example 1

Find the composite area of the shaded region. Use 3.14 for π .

Exercise 1

A yard is shown with the shaded section indicating grassy areas and the unshaded sections indicating buildings or paved areas. Find the area of the space covered with grass in units².

Example 2

Find the area of the figure which consists of a rectangle with a semicircle on top. Use 3.14 for π .

Exercise 2

Find the area of the shaded region using $\pi \approx 3.14$.

Example 3

Find the area of the shaded region.

Redraw the figure separating the triangles; then, label the lengths discussing the calculations.

Exercise 3

Find the area of the shaded region.

Problem Set

1. Find the area of the shaded region. Use 3.14 for π .

2. The figure shows two semicircles. Find the area of the shaded region. Use 3.14 for π .

3. The figure shows a semicircle and a square. Find the area of the shaded region. Use 3.14 for π .

4. The figure shows two semicircles and a quarter of a circle. Find the area of the shaded region. Use 3.14 for π .

5. Jillian is making a paper flower motif for an art project. The flower she is making has four petals; one of the petals is formed by three semicircles, which is shown below. What is the area of the paper flower?

6. The figure is formed by five rectangles. Find the area of the unshaded rectangular region.

7. The smaller squares in the shaded region each have side lengths of 1.5 m. Find the area of the shaded region.

8. Find the area of the shaded region.

9. a. Find the area of the shaded region.

- b. Draw two ways the figure above can be divided in four equal parts.

- c. What is the area of one of the parts in (b)?

10. The figure is a rectangle made out of triangles. Find the area of the shaded region.

11. The figure consists of a right triangle and an eighth of a circle. Find the area of the shaded region. Use $\frac{22}{7}$ for π .
