Lesson 2: Using the Number Line to Model the Addition of Integers

Exit Ticket

Jessica made the addition model below of the expression $(-5) + (-2) + 3$.

- Do the arrows correctly represent the numbers that Jessica is using in her expression?
- Jessica used the number line diagram above to conclude that the sum of the three numbers is 1. Is she correct?
- If she is incorrect, find the sum, and draw the correct model.

Write a real-world situation that would represent the sum.
