Lesson 19: Writing, Evaluating, and Finding Equivalent Expressions with Rational Numbers

Exit Ticket

1. Write three equivalent expressions that can be used to find the final price of an item that costs g dollars and is on sale for 15% off, and charged 7% sales tax.

Using the expressions determine the final price for an item that costs \$75.

If each expression yields the same final sale price, is there anything to be gained by using one over the other?

Describe the benefits/special characteristics/properties of each expression.
